EXPERIENCE

Internship – UI Developer

Infocampus Software Training Institute

11/2022 – 04/2023   *Bengaluru, Karnataka*

Achievements/Task:

- Working on Frontend Optimization and   performance of Website.

- Developing Responsive Websites for better User Interface.

- Built Webpages that are more user-interactive.

- Worked with JavaScript, APIs, Bootstrap, React Material UI, HTML, CSS.

- Worked with ReactJS Components for making code reusable.

PROJECTS

1. **Real Estate Property Listing Web Application using React [Link]**

- This React-based application is used for listing the property that user may interested in.

- User can sign up, login and logout.

- User can search properties based on city, price, type of property, etc.

- User can read more details, view images about that property.

- User can save the property, contact for a particular property and also able to get record of that.

Tech Used: HTML, CSS, Bootstrap, JavaScript, Reactjs

2. **Ecommerce Shopping App Website Using React[Link]**

- This is Real-Time Multiple Vendor Ecommerce Application.

- It has two modules; one is for User and another is for Seller.

- In this application Seller can register and login with his unique id and password. And can add or delete items to sell. Seller can get record details of list of items and quantity that user wants to buy.

- In User module, user can see all the products added by the seller and can buy them.

Tech Used: HTML, CSS, Bootstrap, JavaScript, Reactjs

3. Billing Software for Sales, Education, Small-Large Business [Link]

- This is Real-Time Application for used for billing purpose.

- It has two modules; one is for User and another is for Admin.

- When Admin logged in with particular email-id and password; admin can find all the billing details for a particular user with the key as mobile no and can download the billing invoice of that particular user.

Tech Used: HTML, CSS, Bootstrap, JavaScript, Reactjs

4. Responsive Personal Portfolio [Link]

- This is Responsive Landing Page designed for showing all the details of Personal Portfolio.

- This is a responsive landing webpage that renders well in all devices which have different screen sizes

- In this project, lots of work is done on animation also.

Tech Used: HTML, CSS, Bootstrap, JavaScript

5. Zomato Clone Processing Logic Using JavaScript Promises [Link]

- Zomato Clone Processing Logic contains the steps as:

- Ordering of food, Cancellation of order, Waiting for Restaurant to accept the order, searching for the nearest Valet, Assigning nearest valet, Enabling the Map, and Delivering the food.

- All the above logic are implemented by using JavaScript Promises.

Tech Used: HTML, CSS, Bootstrap, JavaScript
